Ticket volume trend

7-day buckets starting 1 Apr; the final bucket may be shorter.

Month by month

Metric	Apr 2026	May 2026	Jun 2026	Period	First to last
Tickets	1364	1228	1220	**3812**	↓ -144
Median first response	18.5 min	11.2 min	12.8 min	**15.1 min**	↓ -5.7 min
Resolution rate	93.3%	94.3%	91.3%	**93.0%**	↓ -2 pp
First-response SLA breach	48.2%	28.5%	30.9%	**36.3%**	↓ -17.3 pp
CSAT	50.0%	63.4%	66.7%	**59.8%**	↑ +16.7 pp
QA pass rate	56.3%	65.0%	72.7%	**64.5%**	↑ +16.4 pp

Trend compares the first and last month with data. For first response and SLA breach, lower is better.

Definitions

Volume Tickets created in the period (marts.fct_tickets, by created_at).

First response Minutes from creation to first agent reply; unanswered tickets are left out. p50 and p90 use interpolated quantiles (quantile_cont).

Resolution rate Resolved tickets divided by tickets in the group. Per agent, unanswered (unassigned) tickets are not in the denominator.

SLA breach Share of tickets not answered within the channel target (chat 5 min, phone 3 min, e-mail 240 min). Unanswered tickets count as breaches.

CSAT Share of valid 1-5 survey answers that are 4 or 5, by submission date. Shown per agent only with at least 3 answers.

QA pass rate QA scores at or above the pass mark (90) divided by all valid scores, by scoring date.

CSAT band Excellent 90%+, Good 80%+, Fair 70%+, otherwise Low (illustrative thresholds).

> Figures come from the marts of a synthetic support-analytics warehouse, computed by SQL with the definitions in its metrics document. All data is generated for demonstration and describes no real team, customer or organisation.
